

## AI in Law: Shaping the Future of Justice and Legal Practice

**January 21, 2025 — 15:00 to 17:00**  
**St. Johann Church**  
**Berglistutz 3, 7270 Davos, Switzerland**

The contemporary legal system is struggling to meet the needs of society. Most people cannot afford legal representation, leading to a widening access to justice gap, while legal costs pose significant challenges for businesses of all sizes. Historically slow to adopt new technologies, the legal profession now stands at the threshold of transformation with the emergence of large language models and AI.

We are on the cusp of a fundamental shift in legal practice that requires collaboration between legal professionals and technologists. This event brings together global leaders from the legal industry and pioneering technologists to explore the future of the legal profession. We will address open problems, discuss innovative solutions, and chart strategies for the responsible deployment of AI in law.

### **Agenda**

15:00 - 16:00: Private expert round table discussion  
16:00 - 16:10: Transition to public panel  
16:15 - 16:45: Public panel summarizing the round table  
16:45 - 17:00: Public Q&A

*This event is part of the Leading Beyond Boundaries initiative that seeks to provide an opportunity for deep and impactful conversations among scientific, business, and policy leaders during the World Economic Forum. Leading Beyond Boundaries will record the expert round table to form a basis for a public report highlighting the most important insights (under Chatham House Rules).*

*Leading Beyond Boundaries is grateful to partner with MIT Connection Science, the Harvard Center on the Legal Profession, Stanford HAI, and Wisdom House to make this event possible.*
